Design Romani Saccani Architetti Associati

PUPPET RING SP 9

The distinctive feature of this model from the Puppet Ring collection are the rings with increasing diameter. They can be combined in different sequences to form the framework on which the precious glass spheres in three different sizes are placed, blending with the structure thanks to a preformation inside the blown glass. Aesthetically light and elegant, Puppet Ring ethereally combines crystal, smoky, amber and shaded white glass with gold and black matt nickel finishes.
